## **CITY OF LOS ANGELES HAZARD MITIGATION PLAN**

The County of Los Angeles is the responsible authority for the City of Los Angeles and 88 other cities on issues pertaining to health. The County of Los Angeles Local Hazard Mitigation Plan will address the related health hazard, risks, policies and programs and identify proposed mitigation actions. Once the County's plan is completed, it is the intention of the City of Los Angeles to include it as an addendum to the City's Local Hazard Mitigation Plan.
